ELSEVIER

International Journal of Coal Geology 27 (1995) 299

International Journal of coal geology

Contents Volume 27, 1995

Vol. 27 No. 1

Research Papers

Coalification and graphitization of graptolites in the anchizone and lower epizone
G. Rantitsch 1

Application of imaging TOF–SIMS to the study of some coal macerals
X. Hou, D. Ren, H. Mao, J. Lei, K. Jin, P.K. Chu, F. Reich and D.H. Wayne 23

Coal type and rank variation in Tatu Mine, New Zealand
R.P. Suggate 33

Paleoecology of the Springfield Coal Member (Desmoinesian, Illinois Basin) near the Leslie Cemetery paleochannel, southwestern Indiana
D.A. Willard, W.A. DiMichele, D.L. Eggert, J.C. Hower, C.B. Rexroad and A.C. Scott 59

Vol. 27 Nos. 2–4

Research Papers

Controls on peat accumulation and depositional environments of a coal-bearing coastal plain succession of a pull-apart basin; a petrographic, geochemical and sedimentological study, Lower Jurassic, Denmark
H.I. Petersen and L.H. Nielsen 99

Quality variations in the high-sulphur lignite of the Neogene Beypazarı Basin, Central Anatolia, Turkey
M.K.G. Whateley and E. Tuncalı 131

High chromium contents in Tertiary coal deposits of northwestern Washington – A key to their depositional history
M.E. Brownfield, R.H. Affolter, G.D. Stricker and R.T. Hildebrand 153

Petrological evolution of the Paleogene coal deposits of Jammu, Jammu and Kashmir, India
M.P. Singh and G.P. Singh 171

The coal-bearing, Cenozoic As Pontes Basin (northwestern Spain): geological influence on coal characteristics
L. Cabrera, H.W. Hagemann, W. Pickel and A. Sáez 201

^{13}C NMR, micro-FTIR and fluorescence spectra, and pyrolysis–gas chromatograms of coalified foliage of late Carboniferous medullosan seed ferns, Nova Scotia, Canada: Implications for coalification and chemotaxonomy
P.C. Lyons, W.H. Orem, M. Mastalerz, E.L. Zodrow, A. Vieth-Redemann and R. Marc Bustin 227

Palynologic, petrographic and geochemical characteristics of the Manchester coal bed in Eastern Kentucky
C.F. Eble and J.C. Hower 249

Petrographic prediction of coking properties for the Curragh coals of Australia
R.J. Gray and C.M. Bowling 279

Contents Volume 27 299
